

MASTON

**WISE
TINT**

2-COMPONENT TINTING SOLUTION

IN ONE CAN – ALWAYS READY TO USE

THOUSANDS OF COLORS

HIGH STOCK ROTATION

LOW INVESTMENT

FAST AND ACCURATE

LONG POTLIFE

2K Tinting Solution

2K TINTING SOLUTION is the quickest and easiest way to tint and pack custom colours in 2K cans. The solution supports RAL and NCS colour standards and much more.

How does Wise 2K[®] work?

WISE 2K[®] TECHNOLOGY LICENSED BY WISESPRAY INTERNATIONAL LTD. WWW.WISESPRAY.COM.

Two component spray paint. One compartment can. Unlimited Potlife. WISE 2K[®] is a trademark or registered trademark of Wisep spray International Ltd. International patents pending or granted: wisep spray.com/patents

1. The online software www.2kmix.com

EASY TO USE. The colors are easy to identify and the formulas are shown as absolute or accumulative weights in grams. If the individual paste amount is not high enough for accurate tinting, the software advises how many cans should be filled for color accuracy. For serial filling of the same color, simply select the amount of cans to be filled and mix the desired amount in one go.

2. Fast, easy & accurate

THE COLOR RETRIEVAL solution works with ready-to-mix colorants. The formulas are designed for the optimal ratio of resin and hardener.

The tint bases are available in matt, semi-gloss and high gloss. The tint base contains 2K binder, hardener, solvents, additives and propellant.

3. Filling

USE ANY SPRAY PAINT filling machine. We recommend eFill®, the only electric, serial filling capable spray paint filling machine.

4. Long potlife

WORLD'S FIRST LONG POTLIFE 2-component custom spray paint lets the customer enjoy full value from the can. Since the reaction of the resin and hardener takes place when sprayed out into the atmospheric pressure, the customer can save leftover paint for later use.

Technical information

Tinting pastes

VOLUME: 1 liter / 33oz

RESIN TYPE:

2-component epoxy

CLEANING OF RESIDUES:

acetone and cloth

AMOUNT OF PASTES: 15

Before tinting shake upside down for at least 30 seconds. Close the lid after tinting to avoid evaporation. Avoid contact with water.

Tint base

CAN VOLUME: 400ml / 11oz

TINT BASE VOLUME: 300ml / 10oz

COLORANT VOLUME:

95ml +/- 5% depending on the color

RESIN TYPE:

2-component epoxy
